

President Zourabichvili vetoed the Russian Law

18 May. 2024

Today, I vetoed the Russian law.

This law, in its essence and spirit, is fundamentally Russian, contradicting our constitution and all European standards. It thus represents an obstacle to our European path.

This veto is legally sound and will be delivered to Parliament today.

This law is not subject to any changes or improvements, making it an easy veto. This law must be repealed!

Thank you very much.
